### 4m's Top of the Class

4m is helping to create a model environment for pupils at four new schools in Edinburgh.

The schools are part of the Edinburgh Schools PPP (Public Private Partnership), which is transforming education in the city.

Under the project, Miller Construction is benefiting more than 10,000 pupils with new and refurbished accommodation.

The work in Edinburgh includes 10 new primary schools, two new secondary schools, three refurbished primary schools, two new special schools, one new secure unit and one new education centre.

4m flooring uk installed Isowarm underfloor heating and floor screed as a complete package at the four schools where Isowarm has been selected, at locations across the city.

The work was completed on behalf of M & E Contractor, FES Ltd of Stirling, with installation carried out in phases to work in with programme times for the project.
