Designer Flooring from 4m

Levi stores across Europe were given the 4m treatment to create an appealing, durable floor finish within the leading brand's retail centres.

Coloured quartz flooring was installed in Levi stores in high-profile locations across England, Scotland, France, Italy and Belgium.

All floors were applied under a super fast-track installation programme.

Each store was closed for three days to enable a complete interior refit including lighting, wallcovers and the new floor.

4m's professional commercial installation team worked in conjunction with other trades on each site to ensure the project was completed with minimal disturbance.

The new floors look good and provide a hard-wearing, durable and easy-to-maintain finish.
