### Designer Flooring at Maple Fine Foods

Specialist contractor 4m flooring uk Ltd has utilised the latest in flooring technology and design expertise to create a high-performance floor at Maple Fine Foods' new state-of-the-art facility.

4m's own dedicated food industry team installed Flowcrete's Flowfresh HF antimicrobial polyurethane floor finish as Maple Fine Foods new production site in North London.

Maple Fine Foods supply high quality pre-packed meals to blue chip clients, including airlines and the health care sector, and the company is one of the largest in Europe serving this sector.

In line with Maple Fine Foods' commitment to the highest standards, the new floor has been designed to offer the ultimate in performance.

The use of colour is an important factor in the installation, with the Flowfresh HF installed in three shades – red, green and blue – to segregate different working zones such as raw foods, cooking areas and packaging.

The project involved close planning with the client to get the specification to the exact needs. This included designing an underground drainage system complete with stainless steel surface drainage.
