### O2 Arena secures 4m Award

In partnership with Flowcrete, 4m flooring UK, fought off strong competition from across the country to win the Project of the Year category at the annual awards organised by the Resin Flooring Association, FeFRA.

The accolade was awarded for work at the O2 Arena in London, a contract which involved the design, supply and installation of 55,000 square metres of flooring throughout the prestigious venue.

The work involved extensive use of Flowcrete's Industrial Top, Isocrete Renovation floor screed, Flowfast - the ultra-fast curing seamless flooring, as well as the high performance floor coating Flowcoat SF41. The hard-wearing decorative quartz system Peran STB was then used throughout the concourse area.

John Amis, 4m's Contracts Manager who was based on site for the duration of the project said, "This project was a joy to work on. 4m originally laid the floors back in 1999 for the opening of the Millennium Dome, so it was great to be back on site second time around."

"We are thrilled to receive FeRFA's Project of the Year Award jointly with Flowcrete for such a great project."
