4m taking off at RAF Cottesmore

4m Flooring uk Ltd took off at RAF Cottesmore, where our system was installed in a hanger used for the maintenance of the Harrier Aircraft.

An anti-static epoxy floor adhering to BS 2050 was installed over 10,000 square meters, complete with a Skydrol resistant coating.

As well as standing up to Skydrol, the floor also needed to be able to withstand the airbed movement systems which are in place at the base.

The grey-coloured floor was complemented with yellow and green demarcation lines with walkways and work areas clearly marked out in eye-catching blue, lined with yellow and red demarcation lines.

Delivering safety, security and service reliability underfoot ensures 4m is a trusted supplier to the aerospace and defence industry. Our flooring solutions have stood the test of time at RAF bases and aerospace companies across the UK and Europe.
