CASE STUDY

Sweet Success for 4m Flooring

Specialist contractor 4m flooring uk worked against the clock to the deliver a functional floor at Thorntons.

4m's expert food industry team installed Flowcrete Ultrafresh HF polyurethane floor finish, at the chocolate company's Derbyshire headquarters.

For maximum hygiene, stainless steel coving was also included as part of the flooring project, situated in the kitchen of Thornton's staff restaurant.

The floor needed to stand up to heavy cookers and other kitchenware in the area, and be slip-resistant.

A special RAL colour was devised for the project.

4m understands the food industry's need for hygiene and cleanliness and can supply effective solutions.

Our polyurethane flooring is seamless so that there are no cracks or holes where food debris and dirt can gather.
