

ACC has the Power

ACC Flooring has just completed a large photographic studio for Evolution Power Tools in South Yorkshire. The project involved the installation of a high gloss, single colour self-smoothing epoxy screed. As the finished floor would need to retain its colour for the life of the system, Altroflow ICS was selected for its improved colour stability. The system can be tailored to suit individual needs and budgets, simply by adding coloured flakes or even corporate logos.

Having viewed a similar project on the website www.accflooring.co.uk Evolution Power Tools chose ACC Flooring for their studio. They required a single colour, high gloss finish that would provide the perfect setting for their new product photo suite to allow on-site shooting to take place.

The existing concrete substrate was mechanically prepared and the system was installed over a two-day period to coincide with a major product launch by Evolution.

The delighted client said of their new floor, "The system is excellent and will provide a perfect setting for the photographic studio, ACC Flooring displayed professionalism from start to finish on our project.". Following this success, ACC Flooring has secured a second order for the same system to be installed in a new showroom on the same site.

ACC Flooring have been trading for 23 years, supplying seamless resin floors to all industries throughout the UK. The company will provide a flooring solution that is fit for purpose and offer value for money. All the staff are NVQ level 2 qualified and the company is a full contractor member of FeRFA, the resin flooring association.

With free site surveys, full quotations, specifications and warranties, if you need resin flooring installed by a FeRFA Approved installer, call ACC Flooring today on freephone 0800 542 0519 or visit the website at www.accflooring.co.uk.
