## ACC Make it Safe

ACC Flooring has recently completed a major refurbishment project in West Yorkshire a company that repair and service engines for ships and heavy plant. The existing floors were suffering from years of erosion and this was creating trip hazards. The floor had been painted by themselves but was delaminating.

It was necessary for the project to be completed whilst the customer carried on

operating. Working to an agreed programme, as each area was completed, the client moved back in and then released the next area.

A type 3 coating was applied to approx 1400m<sup>2</sup> over four visits; this included all the demarcation, including safety logos.

The client is delighted with the finish and because of the success of this project, ACC Flooring have just been awarded another area with a contract value in excess of £40,000.
