Stunning College Refectory

ACC Flooring Ltd has recently completed this beautiful floor for the refectory at Manchester College of Arts and Technology.

The project involved installing in excess of 3500m² of Altrocast TB screed. First a 50mm thick polymer screed had to be laid to level the old floor up, followed by Altro's damp proof membrane.

The floor was completed in 2 phases to allow the refectory to carry on trading and the finished product is a real success with the students and staff.

ACC Flooring's Nick Megson said "We are all very pleased with the finished result and the floor has also attracted a lot of attention from interior designers and architects with similar project in mind for the company."
