SAFETY AND HYGIENE ASSURED AT Blich JUNIOR SCHOOL

Altro SoloSafe™

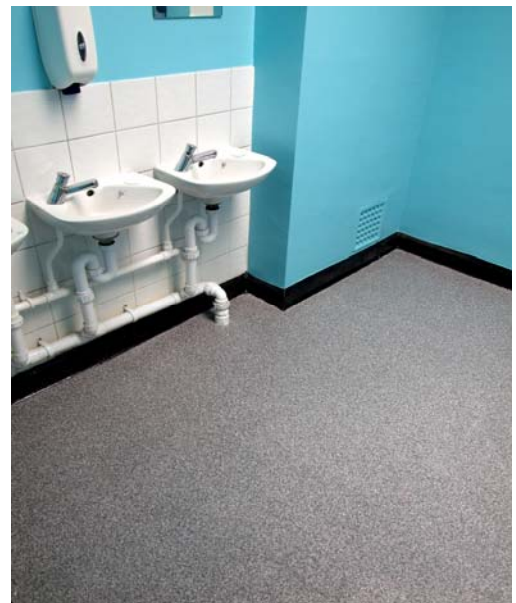

Flooring and walling specialist Altro has received top marks from Blich Junior School in Rochester, Kent, for installing new flooring in the school's toilets.

With toilet areas bearing a lot of wear and tear and the likelihood of water causing a slip hazard, Altro recommended Altro SoloSafe resin screed from its innovative fast-track resin range.

Altro SoloSafe provides a cost-effective, low-odour, rapid-curing floor that is quick and easy to lay and offers consistent wear and slip resistance.

Furthermore, it contains at least 30% recycled material with all components sourced from the EU – helping Blich Junior School meet its important sustainability criteria and reduce its carbon footprint.

Paul Judge from Flordeck enjoyed working with Altro SoloSafe and commented: "It was easy to install and the finished result looks very good. It's the perfect product for toilets and changing room environments providing a robust, safe environment without compromising on aesthetics – and with its speed of application it's perfect for environments with time constraints. I've used Altro SoloSafe on a number of projects and will continue to do so for future contracts."

"For areas such as toilets we needed a floor that was particularly hard-wearing and durable and Altro SoloSafe certainly fits the bill. The floor looks absolutely fantastic and has provided a much better environment for the children, in both looks and hygiene, and we are all thrilled with the results."

Sally Judge, Bursar at Blich Junior School
