

Altroscreed

Altroscreed Chosen For Prestigious RIBA Development

Altro supplied Altroscreed for the new bar in RIBA's (Royal Institute of British Architects) headquarters at 66 Portland Place, W1.

Designed by Azman Architects after the practice won a design competition, the RIBA Bar is a bright, friendly café by day and a contemporary members bar by night.

Whilst furniture and layout can be changed to achieve the two looks, the floor cannot. This meant that Azman had to find a floor that would compliment both roles. They turned to Altro's Altroscreed in the colour 'candlelight' to fit their requirements.

Altroscreed is ideal for use in applications like the RIBA Café as it is highly durable, easy to clean and available in a huge range of colours and textures. Azman Architects chose 'candlelight' because it helped create a bright, airy feel in the café.

Altroscreed is ideal for use in high demand hospitality environments as it is incredibly tough, yet easy to clean. Like many other Altro resin products, Altroscreed is available in a number of textures to improve underfoot safety as well as aesthetic qualities.

Altro's floor, wall, door and ceiling collections give designers the opportunity to specify products that are tailored to their exact needs. From stunning high design floors, to school shower blocks and even hygienic clean rooms, Altro is able to offer a solution. Specifying the right product is simple, thanks to Altro's specialised and highly experienced sales teams who are expert in all products, current legislation and installation issues.
