

Altro Shines At Seaside Resort

AltroCrete PU Heavy Duty

With thousands of people flocking to the coast to enjoy the English seaside every summer, it is vital that holiday resorts around the country maintain the highest standards to ensure visitors enjoy their stay.

Part of Warner Holidays Ltd, Corton Coastal Resort near Lowestoft in Suffolk is enjoyed by hundreds of holidaymakers every year. During a refurbishment programme in preparation for the summer season, the resort turned to interior surfaces specialist, Altro, to provide attractive and functional new flooring.

AltroCrete PU Heavy Duty resin flooring was installed in the resort's restaurant kitchens. This tough and hardwearing floor covering offers excellent slip resistance and has been specially formulated for locations where grip in wet conditions is required, making it the perfect choice for a busy commercial kitchen where there is a high risk of spillages. Its seamless finish is also easy to clean, with no joints where dirt and bacteria can build up.

The AltroCrete resin range is a polyurethane floor covering, available in a selection of different colours and finishes and ranging from 6 to 9 mm in thickness. AltroCrete PU Heavy Duty includes a graded aggregate for a textured surface, combining wear, slip and chemical resistance with ease of cleaning.

"As a busy restaurant kitchen, it's vital that the new flooring offers a safe and hygienic surface for our kitchen team to prepare meals for the hundreds of holidaymakers who visit us every year. Practicality is key. Altro's resin floor will withstand a lot of wear and tear, including occasional spillages and high temperatures surrounding cooking equipment. With hot food and busy staff, a kitchen can be a dangerous working environment, so slip resistance is another important benefit of the new flooring to help us to avoid accidents."

Carl Marjoram, Head Chef
