

SLATER'S 'TOP TOTTY' GOES DOWN A TREAT WITH ARDEX

Slater's Ales of Stafford recently relocated their brewery to larger premises in order to cater for an increase in demand for their range of real ales, which includes the popular ale 'Top Totty'. The premises required a new 300m² resin floor to be installed, and it was vital that the chosen system would meet the high standards of hygiene critical within the UK food and drinks production industry.

Leading specialist applicators of resin flooring, Pola Flooring Services Limited were chosen to install the new floor and they had no hesitation in teaming up with renowned manufacturers of premium resin flooring systems, ARDEX UK.

Already proven throughout numerous similar environments to be fast track, durable and easily cleaned, ARDEX R 90 P Rake and Trowel Grade Heavy Duty Polyurethane Screed

was specified as the perfect resin floor system. Available in a range of colours, ARDEX R 90 P is supplied as four components in pre-measured packs for easy on-site mixing, and its special formulation provides an easily worked system that can be applied rapidly with a pin rake and trowel, making it more efficient to apply than a traditional heavy duty polyurethane screed. The cured system forms a tough, pigmented layer from 4mm up to 9mm thick, ideally suited for use in aggressive areas where a seamless finish is required and maximum cleanliness essential.

"Flooring contractors know that ARDEX's advanced resin flooring range has been innovatively manufactured to provide exceptional on-site results. ARDEX R 90 P Rake and Trowel system is testimony to this fact, and its performance at Slater's Ales was faultless", commented Paul Sant of Pola Flooring Services Ltd.
