Ambulance receives the Degafloor treatment

Huddersfield based Vehicle Conversion Specialists Ltd, an innovative and highly respected emergency service vehicle expert, has recently installed Degafloor resin flooring systems to a number of new ambulances.

Having seen resin floors used within ambulances in other European countries, VCS were keen to be the first UK supplier to offer a more hygienic option to the traditional vinyl sheet solution used for ambulance floors.

Following discussions with a number of suppliers, VCS opted for the Degafloor flake system due to the very fast cure time (within just 2 hours of installation) and wide range of colour options available.

Speaking on behalf of VCS, Technical Director Mark Kerrigan said 'We are always looking at innovative ways to improve our products and offer even better solutions to our customers. The degafloor flake system always us to provide the highest levels of hygiene due to a totally seamless installation. Customer feedback has been incredibly positive and many more orders are expected'.

Notes to Editors:

Degafloor is a leading supplier of MMA based resin flooring systems to a wide range of industrial and commercial environments. Based in Maxey in Cambridgeshire, Degafloor Ltd was established in 2002, although the brand has been operational since 1996.
