

Making Science Sexy at Cleeve School

•Product: Peran SL •Market Sector: Education •Location: UK •Client: Cleeve School •Date: 2008

Cleeve School, located in Cheltenham, has recently undergone a major transformation to its learning facilities through the remodelling of a new build extension to the School building, with a sexy seamless resin floor finish from Flowcrete at the top of its wish list.

The new extension, has been purposely built to house new Science and Music as well as Learning Resource and Admin facilities. The development has been taken in order to provide innovative teaching spaces which challenge the way in which subjects are being taught in the 21st Century.

Flowcrete branded Peran SL was chosen in a bright orange colour to vibrantly enhance the School's new state-of-the-art Science suite. The large laboratory area reflects the school's innovative approach to the changing science curriculum in a drive to make science sexy.

Peran SL is an attractive and colourful resin floor finish that is often make a bold style statement on the floor. Peran SL is extremely hardwearing and offers excellent chemical resistance - making it the ideal product of choice to floor Cleeve's school's new Science laboratory where the surface is prone to chemical spillage from experimental students.
