

Diving Into Improving Schools for the Future

• Product: Peran STB Classic • Market Sector: Education • Location: UK
• Client: The Haberdashers' Aske's School for Girls • Date: 2008

Flowcrete's Peran STB Classic, has been selected by The Haberdashers' Aske's School for Girls to provide a safe and slip-free surface surrounding the Olympic sized swimming pool located in its new state-of-the-art Sports and Fitness Suite.

The Haberdashers' Aske's School for Girls located in Elstree, near Borehamwood is often known as "Habs" or "Habs Girls", to distinguish it from the neighbouring Haberdashers' Aske's Boys' School. The school was founded in 1875 by The Haberdashers' Company, an ancient London livery company and boasts top-flight learning facilities to which the new swimming pool complex is the latest addition.

Peran STB Classic was specified for the pool surround on account of its outstanding anti-slip profile in an area where the safety of school pupils is of paramount concern. Peran STB is a hardwearing, yet decorative, resin floor coating, which offers a seamless, hygienic finish enabling the pool surround to be easily, cleaned, maintained and sterilised.

Peran STB delivers excellent wear and impact resistance and is ideally suited to wet areas - making it the ideal surface underfoot for the Girls School's brand new swimming pool complex.
