

### Grant's Pharmacy Opts For Flowfast Treatment

•Product: Flowfast Terrosso & Flowfast Kristalina •Market Sector: Retail •Location: Ireland  
•Client: Grant's Pharmacy •Date: 2008

Flowfast, the fast track flooring concept from Flowcrete, has been selected to floor a local pharmacy located in the small town of Gorey, Ireland.

Grant's Pharmacy specified Flowcrete's Flowfast Terrosso and Flowfast Kristalina to deliver a seamless and hygienic floor that would be trafficable just two hours after application, meaning Grant's could regain full use of its refurbished and revamped facility under a quick turnaround – an important factor in the fast-paced retail world.

Another factor behind Grant's decision to use Flowcrete's MMA flake system was its terrazzo style finish - creating a welcoming and stylish look for customers.

Utilising the latest in resin technology, Flowfast combines speed of installation with good slip-resistance, ability to withstand thermal shock and impact as well as a seamless finish – making the finished floor easy to clean and maintain, with no cracks or crevices to harbour dust or bacteria.

On top of this, Flowfast offers excellent design flexibility and can achieve complex bespoke designs that make floors so much more than something to walk over.

Grant's opted for a decorative pattern of coloured eggs across the floor – built up in a creative mix of Monet, Picasso, Matisse and Renoir in Flowfast Terrosso and Ebony in Flowfast Kristalina to create a talking point for the local shoppers.
