

### Stauntons' New Look with Fast Flooring Solution

• Product: Flowfast Terrosso • Market Sector: Retail • Location: Ireland • Client: Stauntons Pharmacy  
• Date: 2008

Stauntons Pharmacy, a local provider of medicines, perfume and cosmetics based in Ireland, has achieved a radical new look at its Navan store with the installation of Flowfast - a fast track resin flooring system from Flowcrete.

Stauntons specified Flowfast Terrosso, an MMA flake flooring system with excellent wear, abrasion and scratch resistance, for its ability to deliver a trafficable floor finish just two hours after application - therefore minimising disruption to trade during refurbishment works.

Installed in a decorative blend of Picasso and Rembrandt, the system offers excellent design flexibility making virtually any pattern achievable on the surface of the floor. Stauntons used its floor as a canvas to create a unique decorative walkway that runs from the entrance right through the store to guide customers while browsing.

Flowfast combines speed of installation with good slip-resistance, the ability to withstand thermal shocks and impact as well as a joint-free finish – making the finished floor easy to clean and sterilise, with no cracks or crevices to harbour dirt, dust or bacteria.

With the addition of excellent aesthetics, Flowfast Terrosso achieves a terrazzo style finish to create a welcoming platform for customers to the store.
