

## **Flowcrete Secures Large Scale Deal In Europe**

Specialist flooring manufacturer Flowcrete Group plc has secured one of its largest contracts to date in Europe.

The deal involves almost 120,000 square metres of the car park decking system, Deckshield, at Findel Airport in Luxembourg.

Deckshield is being applied across four decks of the car park. The installation is being carried out by Belgium-based Flowcrete approved contractor, 4m Europe SA, which also has offices in Luxembourg.

Products for the project will be manufactured at Flowcrete's headquarters, in Sandbach, Cheshire.

Flowcrete Director, Tony Gear, who oversees the company's business operations in Europe, said: "This is the largest deal Flowcrete has secured in the Benelux countries and one of the largest – if not the largest – obtained in Europe to date."

Deckshield cosmetically enhances car parks areas and is exceptionally durable and hard-wearing. The product is backed by the promise of a fast installation time and a comprehensive warranty. It provides a convenient and effective method of protecting new developments, as well as enhancing ageing concrete structures.

Deckshield is also fully compliant with BS and DIN standards, has full certification from the BBA, reduces tyre noise and provides a slip-resistant surface.

As well as providing a bright, attractive environment, Deckshield offers a protective system to prevent the ingress of water into the concrete structure, which will last in excess of 10 years.
