

West Ferry Print with Peran ESD SL

• Product: Peran ESD SL • Market Sector: Printing, Packaging & Paper • Location: UK
• Client: West Ferry Printers • Date: 2000

Peran ESD SL was chosen for the printing process plant of the largest newspaper printers in Europe, West Ferry Printers based in London.

Producing around 27 million papers each week to include top titles such as The Telegraph, Financial Times, The Guardian and The Express, the facility needed a flooring product that could withstand a heavy cleaning regime and constant traffic.

Peran ESD SL was chosen for its ability to resist the build up of static electricity which was becoming a health hazard to machine operatives.

Peran ESD SL is a heavy duty floor finish that it is easy to clean and maintain. The full refurbishment was programmed around the production schedule to enable the printers to continue with the daily run of newspapers.
