

PLAYSAFE WITH THE IRL GROUP

Children visiting a garden centre in Guernsey can enjoy the play equipment in safety thanks to IRL Group's new Playsafe system. The product is available in a wide variety of colours, is durable, seamless and cushioned. The open texture allows for good drainage and it is non-flammable. It meets the requirements of BS7188 (1998) and EN1177:2006 and is ideal for play areas such as the one pictured here.

As part of this project, IRL Group also laid approx. 2800 sq metres of Remmers External Quartz Carpet System (FeRFA Type 8 System).
