

## **“Performance Floors for the Motorsport Industry”**

Leading specialist resin flooring manufacturer and contractor, John Lord, were pleased to be involved in the recent refurbishment of the Denis Welch Motorsport facility in Yoxall, Staffordshire.

A heavy-duty polyurethane-based screed, Uragard HT, was chosen as the new floor finish for its hard-wearing, slip resistant and chemical resistant properties.

The flooring refurbishment work totalling approximately 300m<sup>2</sup> was completed during weekends in two phases, allowing downtime to be kept to a minimum at this busy Austin Healey Specialist. Due to the nature of the environment, the old concrete floor had suffered from wear and tear, impact damage and worn joints, so a comprehensive preparation programme was undertaken prior to the installation of the new Uragard floor finish.

As a long-standing client of Denis Welch Motorsport himself, Stephen Lord - Managing Director of John L Lord & Son Ltd, was especially pleased to be invited to carry out the work.

John Lord offers a wide range of performance and decorative resin-based floor finishes to suit commercial garages and dealerships, and private car collections. To arrange a visit by one of our sales team, please contact our Bury Office on 0161 764 4617.
