

The Biggest Ice Cream Production Facility in Europe

Kemtile have recently completed work on Fredericks Dairies new production facility at Kirkby on Merseyside. The state of the art, £10m facility will manufacture tubbed ice cream for two of the UK's biggest retailers and will also be manufacturing tub products under the Cadbury brand. The new site is Europe's largest and most automated production line.

Kemtile installed 1200 sqm Ucrete polyurethane flooring system UD 200 in yellow. The contract also included the installation of Blucher Drains, Stainless Steel Kerbs manufactured by SAW McBride & Sons, the design and installation of all the underground drainage and building a 60,000 litre effluent system.

Kemtile were Principal Contractors for all the fitting out, working with RTS Project and Developments who were project managers for the client. Michael O'Callaghan, Principal of RTS Projects and Developments told us. *"Kemtile undertook the role of Principal Contractor for all the fitting out works and specialist contractors for drainage, stainless steel kerbing and floor finishes at the new Fredericks £10m ice cream production unit in Kirby. They are to be complimented on their resourceful and diligent approach to all aspects including administration, health and safety, design interface and site management aspects. I have no hesitation in recommending them for future works".*
