

Altro gets arty with MANCAT

Altrocast TB Screed

Students and staff at a prestigious Manchester college will be given a bright welcome, as the reception area has been given a face-lift.

Manchester College of Art and Technology (MANCAT) chose to give the entrance hall at its Openshaw campus a fresh new look using a resin floor from Altro's extensive range.

With thousands of students and staff walking through the main reception and circulation area at MANCAT, it was vital the new floor would be able to stand up to daily wear and tear and clean easily. Within an innovative, inspiring building, local architects Butress Fuller Alsop Williams also wanted to create a modern look.

The Altrocast TB Screed in Everest was installed by ACC Flooring Limited. The covering is a hard-wearing, practical floor and gives a seamless finish.

The AltroCast resin range is a collection of epoxy floor coverings, available in a selection of different colours and finishes and ranging from 1 to 4.5 mm in thickness. The flooring combines wear, slip and chemical resistance and is easy to clean.

"It's key that we create a good impression in our reception area, making sure we give off a welcoming, bright and airy feel for visitors, students and staff,"

"We also want the area to help our students relax between lectures or give them space for reflection, so the environment has to respect their requirements. The choice of flooring, fixtures and fittings all play a role in this."

Mark Vernon, Estates Manager at MANCAT.
