:: Installation requirements

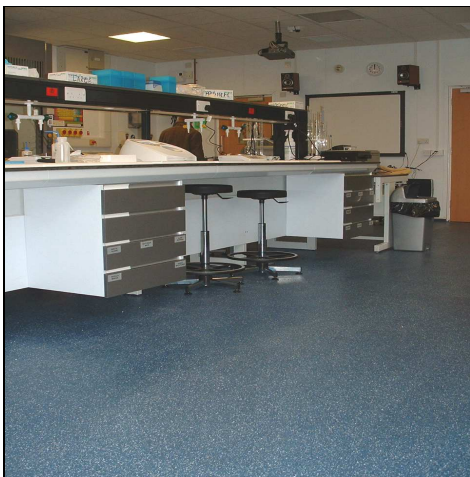

A number of educational establishments within the Lincolnshire area required an alternative product to vinyl flooring. The product needed to maintain a decorative appearance but provide a longer life guarantee than vinyl due to the demanding environments.

:: Why National Flooring?

A situation arose in a Lincolnshire school project where the contractor installing the vinyl claimed that the sub floor needed a moisture barrier and latex leveling screed, all adding to the cost and contract delays.

National Flooring were asked to check the moisture levels and advise on an alternative floor finish. After checking the moisture level National Flooring were satisfied and recommended the Degafloor Flake system, matching the aesthetics to the original vinyl colour. The system provides a hard wearing, hygienic and easy to maintain floor, which was backed by National Flooring with a 10-year warranty.

National Flooring's reputation for elevated customer service meant the work was commissioned and installed to everyone's satisfaction.
