

Designer Domestic 2007

NIFL on the Property Ladder

Nottingham Industrial Flooring Ltd (NIFL) was approached to provide a completely unique flooring solution for a luxury residential refurbishment. NIFL specified Altro's Pebblestone in a further step into Designer Flooring for the family company.

Altro Pebblestone is a blend of natural and synthetic aggregates, bound with an epoxy resin to provide a highly decorative and highly durable flooring solution. NIFL, a recommended installer of all major flooring systems, decided upon Pebblestone after taking a significant number of considerations into account including aesthetic appearance, durability, lead time and budget.

NIFL is using this installation as another step into the growing designer resin flooring market. As competent, experienced designers and installers of these systems NIFL has frequently lent a helping hand to architects, interior designers and main contractors.

The owner of the property said 'After speaking to several Resin installers throughout the country, NIFL came up with a water tight proposal and an even more impressive installation which I'm 100% happy with. I'd recommend NIFL to anybody looking to take on a refurbishment project like mine.'
