

Thomas the Baker York 2009

NIFL Installs Flowfast Terrosso...

A bespoke floor finish from Flowcrete has recently been installed by NIFL in only 6 hours at Thomas the Baker in York.

The client approached NIFL with a demanding specification. The existing floor was a dull, tired looking resin floor in need of an update. They wanted a floor that was attractive, easy to clean, hardwearing and in a colour that matched the company's image. The problem faced was that it had to be installed with a minimum disruption to business.

Bearing this in mind NIFL suggested Flowfast Terrosso. Flowfast Terrosso provides a seamless finish making it easy to clean and maintain, perfect for this hygienic environment.

Beginning work at 4am the NIFL team ensured business closure was kept to a minimum, with the shop open by lunchtime.

The standard Flowfast Terrosso colours did not match the Thomas the Baker image exactly. Therefore, NIFL created a bespoke blend of flakes which suited the shop perfectly.

Using the latest resin technology Flowfast Terrosso provided our client with an attractive, hardwearing floor that can stand up to all the demands associated with floors for public spaces that could be completed within the necessary timeframe.

'Thank you for adhering to our tight time frame. The floor looks superb and we are very happy with the result.' Thomas the Baker
