## **PPC INTRODUCES NEW CLEANING AND MAINTENANCE COURSE**

The Preparation Group, has introduced a new course to its 2012 training program entitled 'Refurbishing, Cleaning & Maintaining Hard Floors'. The course will focus on the environmentally friendly restoration of surfaces such as concrete, terrazzo & marble back to their initial beauty.

Using the latest methods and accessories applied to autoscrubbing/drying equipment, delegates will learn how to remove scratches and the build-up of dirt and grime to produce hygienically clean, glossy surfaces without the need for harsh chemicals.

Says Tracey Glew, Managing Director; 'We have introduced this course due to increased customer demand for cost effective floor refurbishment solutions. The latest accessories available for autoscrubbing equipment are capable of more than just cleaning. Our course will teach delegates a variety of processes, stage by stage that can transform a floor with minimal investment.'

**The Preparation Group is offering 20 free places on the opening 'Refurbishing, Cleaning & Maintaining Hard Floors' course to be held on Wednesday 15<sup>th</sup> February 2012 on a first come, first served basis. Call 01522 561460 to book.**
