## NEW DIAMOND PADS ARE SET TO GO DOWN A STORM

For flooring contractors seeking a simple, cost effective and environmentally friendly solution for cleaning, maintaining and high shining polished floors, The Preparation Group's new Storm Diamond Pads are the answer.

The new pads are prepared with billions of microscopic diamonds to hygienically clean and produce a high gloss finish on floors without the need for harsh chemicals, waxes and polishes and unlike competing pads on the market, they are also double sided for twice the value.

The Storm Diamond Pad's easy cleaning system involves removing any loose contaminants from the designated surface e.g. dust, sand or gravel, placing the pad under your machine and then adding water - you are then ready to start. No tools are required as there is no fixing involved, the weight of the machine holds the pad in place.

The new Storm Diamond Pads produce optimum cleaning and polishing results on; resin floor surfaces, epoxy, terrazzo, marble, natural stone, concrete and vinyl. They are designed to fit The Preparation Group's STG450 machine, along with most other types of surface texturing, auto scrubbing and polishing machines.

Other benefits of the Storm Diamond Pads are that they adjust to irregularities in the floor, can be used dry as well as wet for a smooth finish and are ideal for small areas, even

edgework. They are available in three grit sizes; 800, 1500 and 3000, the selection depending on the condition and type of surface.

For further information or a demonstration on how Storm Diamond Pads renovate dull, worn floors, call The Preparation Group on 01522 561460.
