

TVR DEMANDS HIGH TECH FLOOR

When TVR decided to refurbish their prestige car showroom at Chiswick, they demanded a high tech floor that could incorporate their company logo and provide a highly decorative yet hard wearing, durable and easily cleaned surface, on which to display their advanced high tech sports cars.

Their flooring specialist Loughton Contracts plc knew that Remmers could provide the perfect solution. A high tech floor finish with an image to match that of TVR.

The answer was to prepare the concrete and screed then apply the Acolan Stone Carpet system which is a blend of Viscacid Construction Resin binding together millions of tiny coloured pebbles.

With the advanced Remmers materials, Loughton were able to design and incorporate the famous TVR logo just as the client had wished.
