

NEW FeRFA PUBLICATION AVAILABLE TO DOWNLOAD

FeRFA's *Guide to Flowable Polymer Screeds as Underlayments for Resin Floor Finishes* is the latest document to be published by the Resin Flooring Association and is available to download from the website.

The new 8-page guide includes information and advice on the selection and application of flowable polymer modified screeds.

It is the eighth document in FeRFA's series of technical guidance notes - all of which are designed to aid the specifier when considering resin flooring. All the FeRFA's publications are available to download free from the website

<http://www.ferfa.org.uk/html/publications.htm>

FeRFA is a member of RIBA's CPD Providers Network and its informative documents cover: Selection of Synthetic Resin Floors, Specification and Application, Static Controlled Flooring, Assessing Slip Resistance, Osmosis, Chemical Resistance, Substrates with high moisture content, Cleaning resin floors, Resin Terrazzo and Use of PPE.

Words 140

Seamless resin flooring provides a high performance, durable finish to suit both industrial and commercial applications. With specialist hygienic, slip resistant, chemical resistant and anti static systems available, resin flooring satisfies the demanding requirements of today's industrial environments.

FeRFA, the Resin Flooring Association, represents the major product manufacturers, specialist contractors and surface preparation companies, raw material suppliers and specialist service providers within the UK Resin Flooring Industry.
