PRESS RELEASE

FeRFA welcomes five new Associate members

FeRFA, the resin flooring association, has recently been joined by a further five companies who, not only benefit from membership of FeRFA but, as Associates, bring with them their specialist products and services to support and assist existing members:

DERBYSHIRE AGGREGATES

Derbyshire Aggregates export products all over the world from its Youlgrave plant in Derbyshire where dried aggregates they are washed, dry screened and packaged to customer requirements. Available for immediate delivery off the shelf and throughout the UK and Ireland, Derbyshire Aggregates has a wide selection of natural coloured dried decorative minerals, including granite, quartz, basalt and bauxite. Colour coating is available to many of these products if required. Many other high PSV materials can be custom processed to specific requirements and materials can be contract processed. Deliveries can be by bag, bulk bags, tankers and bulk tippers. Minerals are sourced worldwide with custom processing at the Arbor Low manufacturing plant.

Delivering customer requirements when, where and in quantities to match the most demanding schedules are a feature of DAs operations. Derbyshire Aggregates also has a large aggregate library to help source materials and via its haulage network deliveries can be arranged 24 hours a day 7 days a week.

INCOREZ LTD

The company is a leading manufacturer of specialist resins and polymers, excelling in the development of high performance, low hazard materials, particularly waterborne and high solids systems.

Incorez is also a global leader in oxazolidine chemistry, manufacturing a range of products marketed under the Incozol® umbrella. The Incozol® range has been widely adopted in 1K and 2K polyurethane coatings, as well as 1K PU sealants, where they operate as moisture scavengers, reactive diluents and curing agents.

In addition, the company is a global partner in waterborne, low hazard technology, manufacturing a wide range of waterborne aliphatic polyurethane dispersions and an extensive range of waterborne epoxy curing agents. These materials, marketed under the Incorez® brand, are used extensively in high performance coatings across a broad spectrum of applications.

STATIC SAFE ENVIRONMENTS LTD

Static Safe Environments Ltd (SSE) is a specialist company supplying products, advice and services to combat the problems occurring in industries where sensitive components can be damaged or degraded by electrostatic discharge (ESD).

SSE is available to help material suppliers, contractors and clients establish which specification a floor should meet in order to prevent the potentially very serious consequences associated with static discharge.

With over 30 years experience in the electrostatic sector, Static Safe Environments has an established and enviable reputation as experts in the field of assessing, testing and reporting on the performance of floors. Our Field Service Engineers carry with them all the appropriate floor testing equipment and are conversant with the relevant National and International Standards.
