

BENEFIT FROM FeRFA's TECHNICAL EXPERIENCE

FeRFA has been representing the resin flooring industry for over 47 years and has built up a wealth of knowledge specific to this market. The technical committee meets regularly throughout the year to write and revise technical guidance notes, review standards, keep a watching brief on changes in legislation affecting the industry and environment, and ensure representation on regulatory bodies such as BSI.

FeRFA CLASSIFICATION SYSTEM FOR FLOOR TYPES

FeRFA developed an easy to understand classification system for the different types of resin flooring (graded from 1 to 8). This system has been adopted by the BSI for their Code of Practice BS 8204-6: Screeds, bases and in situ floorings: Synthetic resin flooring. Full details of the classifications and a description of each type are in the Guide to Selection and can also be viewed at: <http://www.ferfa.org.uk/html/products.htm>

TECHNICAL GUIDANCE NOTES

The Technical Guidance Notes produced by FeRFA are freely downloadable from the website and may be incorporated within members' own publications and literature (with acknowledgement). These are an invaluable source of information and guidance to assist in the selection and specification process.

- FeRFA Guide to the Specification & Application of Synthetic Resin Floors (RIBA CPD Approved)
- FeRFA Guide to the Selection of Synthetic Resin Floors
- Measuring and Managing the Level of Slip Resistance provided by Resin Floors
- Comfort Resin Flooring Systems
- Osmosis in Resin Flooring
- Chemical Resistance of Resin Flooring
- Static Controlled Flooring
- Guide to Installing Resin Flooring Systems onto Substrates with a High Moisture Content
- Cleaning and Maintenance of Resin Floors
- Guide to Seamless Resin Terrazzo
- Flowable and Trowel applied Polymer Screeds as Underlayments for Resin Floor Finishes
- FeRFA Guide to the Selection of Deck Waterproofing and Wearing Surfaces for Car Parks
- FeRFA Guide to the Specification and Application of Screeds
- FeRFA Guide to Resin Bound Systems for External Applications
- FeRFA Guide to Resin Bonded Surfacing for External Applications
- Guide to PPE for use with in situ resin floors and floor preparation (available as a download and also as a free pocket guide to give to employees)

As a member of the RIBA CPD providers' network, FeRFA publications can be used as training material.

TECHNICAL ENQUIRIES

Technical enquiries may be sent to FeRFA by email secretariat@ferfa.org.uk FeRFA does not directly undertake the physical investigation of site problems, it does operate a complaints procedure – details on the website www.ferfa.org.uk
