

BENEFIT FROM FeRFA's TECHNICAL EXPERIENCE

FeRFA has been representing the resin flooring industry for 40 years and has built up a wealth of knowledge specific to this market. The technical committee meets regularly throughout the year to write and revise technical guidance notes, review standards, keep a watching brief on changes in legislation affecting the industry and environment, and ensure representation on regulatory bodies such as BSI.

FeRFA CLASSIFICATION SYSTEM FOR FLOOR TYPES

FeRFA developed an easy to understand classification system for the different types of resin flooring (graded from 1 to 8). This system has been adopted by the BSI for their Code of Practice BS 8204-6: Screeds, bases and in situ floorings: Synthetic resin flooring. Full details of the classifications and a description of each type are in the Guide to Selection and can also be viewed at: <http://www.ferfa.org.uk/html/products.htm>

TECHNICAL GUIDANCE NOTES

The Technical Guidance Notes produced by FeRFA are freely downloadable from the website and may be incorporated within members' own publications and literature (with acknowledgement). These are an invaluable source of information and guidance to assist in the selection and specification process.

- FeRFA Guide to the Specification & Application of Synthetic Resin Floors (RIBA CPD Approved)
- FeRFA Guide to the Selection of Synthetic Resin Floors
- Minimising Slips in the Workplace
- Osmosis in Resin Flooring
- Chemical Resistance of Resin Flooring
- Static Controlled Flooring
- The Effective Use of Surface Damp Proof Membranes
- Cleaning and Maintenance of Resin Floors
- Guide to PPE for use with in situ resin floors and floor preparation (available as a download and also as a free pocket guide to give to staff)

As a member of the RIBA CPD providers' network, FeRFA publications can be used as training material.

TECHNICAL PANEL

Technical enquiries may be sent to FeRFA and will be passed to the Technical Panel to be answered. There is also a FAQ section on the website at:

<http://www.ferfa.org.uk/html/faq.htm>

ASSOCIATE CONSULTANTS

FeRFA does not directly undertake the physical investigation of site problems (but it does operate a complaints procedure – details on the website). In situations where more detailed advice or investigation is necessary, FeRFA maintains a list of independent consultants who are known to have particular knowledge of resin flooring. Details may be found at:

<http://www.ferfa.org.uk/html/consultants.htm>
