

PRESS RELEASE

RESIN 16 APPRENTICES TAKE FINAL TRAINING MODULE

Apprentices from the 16th resin flooring group thoroughly enjoyed their final training session - run by FeRFA trainer Terry Foxley and Andy Hill from PFT Central.

Everyone had the opportunity to handle the specialist pumping equipment used for the application of the flowable screed and were guided through each step of the process of mixing and laying pumped screeds.

The group were shown the correct setting up procedure of the M-tec mixing pump, preparation of the floor area, setting levels, how to carry out flow tests and safe operation of the pump.

Instarmac kindly supplied all the materials as well as hosting the two-day session at the Tamworth headquarters.

The apprentices will continue their training by gaining on-site supervised experience with their employers, all of which will be logged in preparation for their assessment with Kevin Cook and Mike Squirrel.

The apprentices in Resin group 16 are: Daniel McLaughlin and Jordan Speed (4m Floors UK), Matthew Marvin and Adam Moore (Central Flooring), Danny Malone (Coatech Ltd), Jack Findlay (Genco Construction), Jason Earl (IRL Group Ltd)
